

# Drape, Ice and Rope Light Chain Guide

## Window Drapes Guides

Which MK range is best for you:

**Outdoor** If you want to light windows from the outside, and your lights will not be within touching distance of the public. This range comes in either black cable, or white cable, to suit your environment. (Note: the outdoor range can also be used indoors if it suits)

**Indoor.** If you want to light your windows from the inside, and your lights will not be within touching distance of the public. This range comes in transparent cable only.

**Low Voltage:** If you think your lights will be in touching distance of the public, low voltage is the way to go. This range can be used indoors and outdoors. This range comes in transparent cable only.

### Drape Width

The drapes in each range come in 2m widths.

Drapes can be linked to make them wider.

Depending on the selected range, there are ways to make the drapes narrower, to suit your needs (more details below)

### Drape Length

The drapes in each range come in 3 x basic lengths: 1.5m. 3m. and 6m

## 1.5m Long drape

### Outdoor

With a choice of cable colour, and LED colour:

		019-329	
		019-330	
		019-335	
		019-373	
		019-374	
		019-430	
			019-338
			019-339
			019-423
			019-431

A maximum of 12 x drapes can be powered from one plug and one rectifier. Allowing for a 1.5m drape up to 24m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 1.5m Long drape

**Indoor**

With a choice of LED colour:

		017-046	
		017-055	
			017-058

A maximum of 12 x drapes can be powered from one plug and one rectifier. Allowing for a 1.5m drape up to 24m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 1.5m Long Drape

### Low voltage

With a choice LED colour

 	029-003
 	029-004
  	029-052
  	029-112

A maximum of 6 x Low voltage drapes can be chained together. Allowing for a 1.5m drape 12m wide.

The type of transformer required depends on how many drapes you wish to chain together:

- 1 or 2 drapes

- 3 or 4 drapes

- 5 or 6 drapes

(Note: The drape can be broken down into 1m widths. Individual strands cannot be removed on the low voltage drapes)

### 3m Long Drape

#### Outdoor

In a choice of cable colour and LED colour

		019-331	
		019-332	
		019-336	
		019-378	
		019-432	
			019-340
			019-341
			019-433
			019-434

A maximum of 12 x drapes can be powered from one plug and one rectifier. Allowing for a 3m drape up to 24m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 3m Long Drape

**Indoor**

In a choice of LED colour

 	017-047
 	017-056
  	017-059

A maximum of 12 x drapes can be powered from one plug and one rectifier. Allowing for a 3m drape up to 24m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 3m long drape

### Low Voltage

In a choice of LED colours

 	029-067
 	029-068

A maximum of 4 x drapes can be chained together. Allowing for a 3m drape up to 8m wide

The type of transformer required depends on how many drapes you wish to chain together:

- 1 x drape:

- 2 x drapes

- 3 to 4 drapes:

(Note: The drape can be broken down into 1m widths. Individual strands cannot be removed on the low voltage drapes)

## 6m Long Drape

### Outdoor

With a choice of cable colour, and LED colour:

		019-333
		019-334
		019-337
		019-441

A maximum of 6 x drapes can be powered from one plug and one rectifier. Allowing for a 6m drape up to 12m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 6m long drape

**Indoor**

In a choice of LED colours

		017-040	
		017-057	
			017-060

A maximum of 6 x drapes can be powered from one plug and one rectifier. Allowing for a 6m drape up to 12m wide

(Note: Individual strands can be removed to make the drape slimmer)

## 6m long drape

### Low Voltage

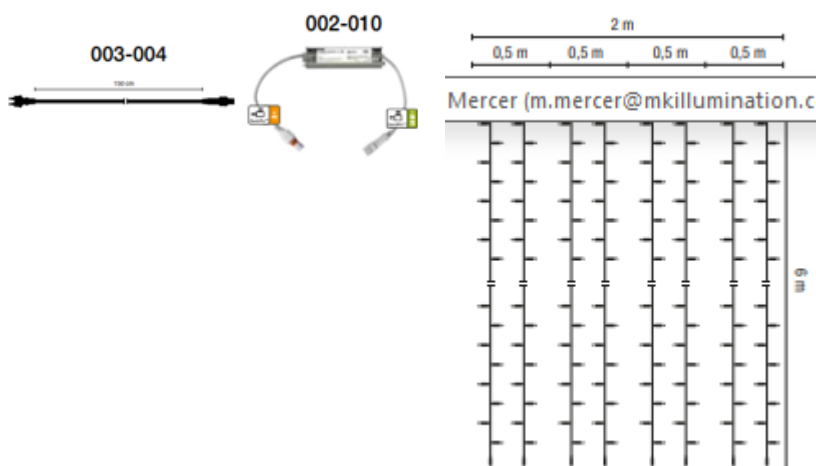

With a choice of LED colours:

 	029-069
 	029-070

A maximum of 2 x drapes can be chained together. Allowing for a 6m drape up to 4m wide

The type of transformer required depends on how many drapes you wish to chain together:

- 1 x drape:

- 2 x drapes

(Note: This drape can be split into 50cm widths. Individual strands cannot be removed)

## Ice Light Guide

Which MK range is best for you:

**Outdoor** If your ice lights will be out of reach of the public. Outdoor is the best way to go. With a choice of black cable, or white cable

**Low Voltage**. Choose this range if you think people will be getting up close to your ice lights. With options in black cable and transparent cable

We have a choice of Ice light length. 50cm, 90cm, and 150cm

### 50cm Ice

#### Outdoor

With a choice of cable colour and LED colour:

019-342	 
019-343	 
019-348	 
019-435	 
019-390	 
019-398	  
019-352	  
019-436	  
019-353	  
019-437	  

A maximum of 50 x 50cm ice light sets can be chained together from one plug and one rectifier. Allowing for a run of 50cm ice lights up to 150m long.

(Note the sets come in 3m lengths, which can be split into two 1.5m lengths)

### 50cm Ice

#### Low Voltage

With a choice LED colour

029-118  LED

029-119  LED

A maximum of 22 x 50cm ice light sets can be chained together from one plug and one transformer. Allowing for a run of 50cm ice lights up to 44m long.

The transformer required depends on the number of ice lights you wish to chain together:

- 1 or 2 sets:

- 3 to 5 sets:

## 90cm Ice Lights

### Outdoor

In a choice of cable colour and LED colour

019-344	 
019-345	 
019-349	 
019-438	 
019-400	  
019-351	  
019-439	  
019-350	  
019-440	  

A maximum of 36 x 90cm ice light sets can be chained together from one plug and one rectifier. Allowing for a run of 90cm ice lights up to 108m long.

(Note the sets come in 3m lengths, which can be split into three 1m lengths)

## 90cm Ice Lights

### Low Voltage

In a choice of LED colour

029-010	 
029-009	 
029-113	  
029-056	  

A maximum of 15 x 90cm ice light sets can be chained together from one plug and one transformer. Allowing for a run of 90cm ice lights up to 30m long.

The transformer required depends on the number of ice lights you wish to chain together:

- 1 x set:

- 2 or 3 sets:

- 4 to 7 sets:

- 8 to 15 sets:

(Note the sets come in 2m lengths, which can be split into two 1m lengths)

## 150cm Ice Lights

### Outdoor

In a choice of cable colour and LED colour

019-346	 
019-347	 
019-396	 
019-397	 

A maximum of 26 x 150cm ice light sets can be chained together from one plug and one rectifier. Allowing for a run of 150cm ice lights up to 104m long.

(Note the sets come in 4m lengths, which can be split into four 1m lengths)

## 150cm Ice Lights

### Low Voltage

In a choice of LED colour

029-058	 
029-059	 
029-114	  
029-060	  

A maximum of 7 x 150cm ice light sets can be chained together from one plug and one transformer. Allowing for a run of 150cm ice lights up to 28m long.

The transformer required depends on the number of ice lights you wish to chain together:

- 1 x sets:

- 2 or 3 sets:

- 4 to 7 sets:

Set	Length
001-001	1m
001-002	1m
001-003	1m
001-004	1m
001-005	1m
001-006	1m
001-007	1m
001-008	1m
001-009	1m
001-010	1m
001-011	1m
001-012	1m
001-013	1m
001-014	1m
001-015	1m
001-016	1m
001-017	1m
001-018	1m
001-019	1m
001-020	1m
001-021	1m
001-022	1m
001-023	1m
001-024	1m
001-025	1m

001-097	1m
001-098	1m
001-099	1m
001-100	1m

(Note the sets come in 4m lengths, which can be split into four 1m lengths)

## Rope Light Guide

Which MK range is best for you:

**Outdoor** If your lights will be out of reach of the public. Outdoor is the best way to go.

**Low Voltage**. Choose this range if you think people will be getting up close to your lights.

### Outdoor

In a choice of LED colours

248-200	
248-201	
248-202	
248-203	
248-204	
248-205	

This rope light comes on rolls of 45m. And a maximum of 90m can be run off one rectifier and plug

Note: This rope light can be cut every 1m.

## Low Voltage

In a choice of LED colours:

245-030	
245-031	
245-032	
245-033	
245-034	
245-035	
245-036	
245-037	

This rope light comes on rolls of 20m. And a maximum of 60m can be run off one transformer and plug.

The type of transformer required depends on the length of rope light you wish to run.

Note: This rope light can be cut every 33cm

- 33cm to 396cm:

- 429cm to 1089cm:

- 1122cm to 2112cm:

- 2145cm to 4224cm:

- 4224cm to 6000cm:

## Using Rope Light

As mentioned above. The **Outdoor** rope light can be cut every 1m. And the **Low Voltage** rope can be cut every 33cm.

The rope light is marked to show where to cut. If you cut anywhere except where it is marked, it will no longer work

Both ranges require a connection kit:

Once you have cut your rope light to the desired length. Block one end using the cap. Leave it loose for now, until we have the rope light powered up.

Next, pushing the connector pin into the start of the rope light length.

Examine the end and find the two small holes with exposed wires in them.

Push the pointed end of the connector into these two small holes.

Push it in as far as you can.

Slide the heat shrink on, ready for later

Next, we need to connect the rope light to the power source.

Slide the pins into the rubber sleeve, and into connector.

Use a heat gun on the rubber sleeve to make it softer and easier to work with

Before inserting the pins, take note, that they are not central. Line up the pins with the holes before inserting.

Once inserted, the connections should be flush

Now, before we seal it, plug it in.

If it works, move onto the next step.

If it doesn't. Go back to the start and put the pins in the "end" of the rope length.

The reason for this is rope light is polarity sensitive. It only works with the pins in the correct way.

Once its working, seal the joins using the heat shrink tube we slid on earlier.

Use the tube of glue supplies with the connection kit. Squeeze some glue around each join, then slide the heat shrink over the join, and use the heat gun to shrink it into place.

Repeat this on the end of the rope light, to seal the end cap in place
