THE POWER OF ILLUMINATION & IMAGINATION

Bespoke and tailor-made Christmas projects and light installations to meet the needs and aspirations of our clients.

MANCHESTER
CITY COUNCIL

CREATIVITY DESIGN & PROJECT MANAGEMENT

From the inception of the idea to the final installation, we handle every aspect of the process. Our experienced team project manage the entire journey; from concept and design, to manufacturing, installation and storage.

BEAUTIFULLY CRAFTED & INNOVATIVE

Our team of designers are committed to pushing the boundaries of artistic expression, creating unique and bespoke lighting designs that will captivate your audience. If you have a Christmas event planned and need some design and inspiration get in touch with us today and let us bring your outdoors or indoors to life.

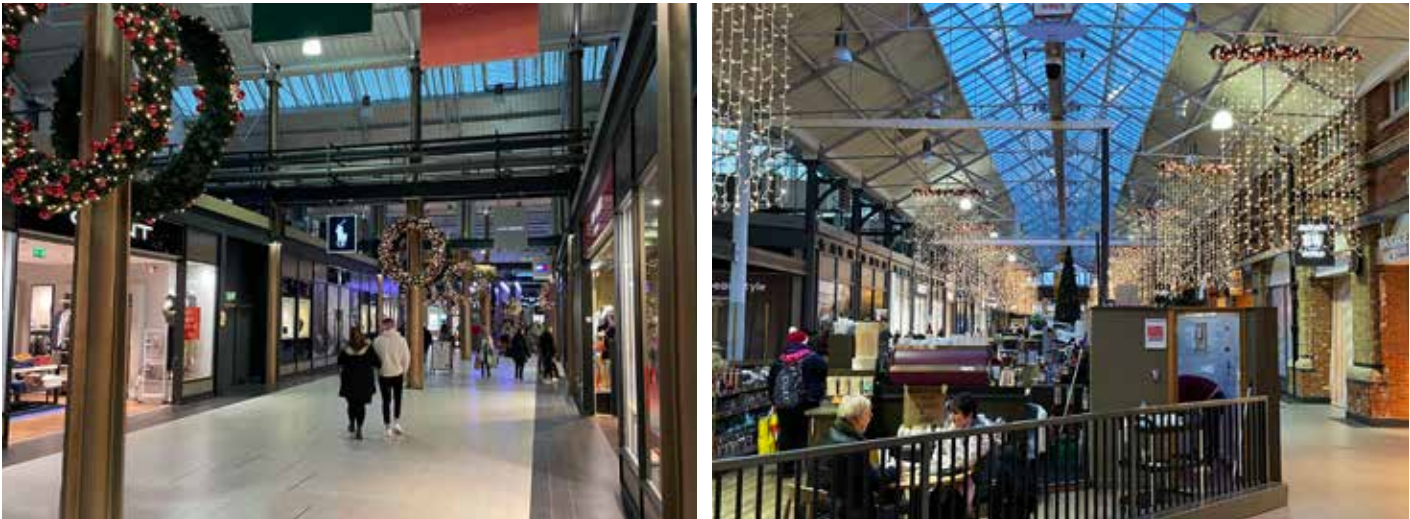

THE DIFFERENCE BETWEEN DECORATION & TRANSFORMATION

We understand that every location has its distinct character and requirements. That's why we take a personalised approach to each project, crafting light installations that go beyond decoration.

SUSTAINABILITY & OUR COMMITMENT

We have systems in place to manage recyclables and energy as well as to reduce CO2 emissions, especially in packaging and production processes.

LONG-LIFE PRODUCTS LEAD TO LOWER CO2 EMISSIONS

We have the longest-lasting products on the market, as confirmed once again by sustainability consultants Denkstatt. This saves resources because the highest CO2 emissions occur in production. We source a considerable part of the energy for this from clean sources.

ORGANIC MATERIAL

We are pioneers in the use of biomaterial. Since we began using organic materials in 2012, our range of products in our organic range has continued to expand, culminating in our current ORGANIC PRO series. We are constantly researching and innovating in this area.

LOCAL AND REGIONAL FOCUS

We believe that we have a role to play in creating secure jobs and contributing to the vitality of the regions in which we work. With that in mind, we actively partner with regional suppliers to make a positive difference in the area.

LOW ENERGY CONSUMPTION

Since 2008, our lighting products have been 100% LED, with 80% less energy consumption when compared to classic incandescent lamps. Our Eco-Premium LED is designed to save consumers another 50% of energy.

BUY SMART

We were the first in the market to offer a quality model, offering users guarantees of the safety, legality, efficiency and maximum sustainability of our products.

PACKAGING

We already use environmentally friendly packaging and are continually working on new ways to reduce our packaging material in our quest to avoid it entirely.
